ABSTRACT

This report presents basic financial data on the United States public school system for the 1970-71 school year. The report contains tables of estimated financial data on a national and regional basis, based on information derived from a national sample of 2,520 local school systems. In addition, other tables present extensive school financial data on a system-by-system basis. Throughout the report, data are grouped on the basis of school system average daily membership (ADM) and according to the metropolitan or nonmetropolitan character of the area served by each school system. With a few exceptions, all of the data were furnished by individual state education agencies. Information on the sample design and survey methodology, as well as a reproduction of the survey form, is presented in the appendix. (JG)

HIGHLIGHTS

Sources of Funds

In the school year 1970-71 an estimated $45.5 billion was received by the local public school systems in the 50 States and the District of Columbia. Revenue receipts, the main components of which are receipts from school taxes and appropriations from local, State, and Federal Governments, accounted for $42.4 billion (93 percent of all receipts). Nonrevenue receipts, primarily proceeds from the sale of bonds, came to $3.1 billion. (See tables A.1 - A.5.)

Distribution of Revenue Receipts

Slightly over half (55 percent) of all revenue receipts came from local and intermediate sources, 37 percent from State sources, and 8 percent from Federal sources. In general, this distributional pattern remained stable over the five largest enrollment-size groups. However, in the systems with fewer than 300 pupils, almost two-thirds (63 percent) of the revenue receipts came from local and intermediate sources. In each of the size groups, nonmetropolitan systems tended to have fewer receipts from combined local and intermediate sources and more receipts from State sources. Each of the four regions had a distinct distributional pattern. At the extremes were the Great Lakes and Plains region, in which 64 percent of all revenue came from local and intermediate sources, 31 percent from State sources, and 5 percent from Federal sources; and the Southeast region, for which the comparable percentages were 35, 50, and 15. (See tables C.1 - C.5.)

Federal Receipts

Revenue receipts from Federal sources came to $3.3 billion (8 percent of all revenues of local school systems). Size of school system did not appear to be an important factor in the proportion of receipts from Federal sources but important differences showed up by location. This proportion was considerably higher in central city (metropolitan, central) and nonmetropolitan systems (each 10 percent) than in suburban (metropolitan, other) systems (5 percent). Also, this proportion was notably higher than average for the Southeast region, where it was 15 percent.

Ninety-two percent of the Nation's school systems received Federal aid in 1970-71. Virtually all of the systems with enrollments of 300 or more received some form of Federal aid, compared with only three-fourths of those with fewer than 300 pupils. In the Southeast region, however, almost all systems--irrespective of size--received some form of Federal aid. (See tables D.1-5.)

FOREWORD

This report, which contains basic data on finance in the Nation's public school system for the school year 1970-71, is part of the Elementary-Secondary General Information Survey (ELSEGIS) series, a cooperative venture of the National Center for Education Statistics (NCES) and the State education agencies. Utilizing information derived from a sample of 2,520 school systems, the report provides tables of national estimates and basic quantitative financial data.

The ELSEGIS series was developed to meet a need for reliable data on individual local public school systems for planning, policy, and research purposes. To this end, the data have been used by Federal, State, and local educational administrators as well as by private organizations.

Our sincere appreciation is expressed to the State agency research and statistical personnel, as well as local school officials, with whose cooperation a response rate of nearly 100 percent was attained.

The collection and editing phase of this survey has been conducted in the Elementary-Secondary Surveys Branch by Gerald Kahn, assisted by Joanell Porter.

Theodore H. Drews, Acting Division Director

Summary Tables

(Each set of lettered tables consists of 5 sub-tables, as follows: 1. United States, 2. North Atlantic, 3. Great Lakes and Plains, 4. Southeast, and 5. West and Southwest.)

A. 1-5 -- Revenue and nonrevenue receipts of local public school systems, by source of funds and by enrollment size of system and metropolitan status: 1970-71 . 7

B. 1-5 -- Federal revenue receipts of local public school systems, by program and by enrollment size of system and metropolitan status: 1970-71 11

C. 1-5 -- Percent distribution of revenue receipts of local public school systems, by source of funds and by enrollment size of system and metropolitan status: 1970-71 16

CONTENTS--(Continued) Page

D. 1-5 -- Percent of local public school systems receiving assistance from specified Federal programs, by enrollment size of system and metropolitan status: 1970-71 21

E. 1-5 -- Summary of expenditures of local public school systems, by major account category and by enrollment size of system and metropolitan status: 1970-71 . 26

F. 1-5 -- Summary of expenditures of local public school systems made directly by the local school system, by major account category and by enrollment size of system and metropolitan status: 1970-71 31

G. 1-5 -- Summary of expenditures for school purposes made by agencies other than the local school system, by major account category and by enrollment size of system and metropolitan status: 1970-71 36

H. 1-5 -- Current expenditures of local public school systems allocable to pupil costs, by account category and by enrollment size of system and metropolitan status: 1970-71 41

I. 1-5 -- Current expenditures allocable to pupil costs made directly by the local school system, by account category and by enrollment size of system and metropolitan status: 1970-71 46

J. 1-5 -- Current expenditures allocable to pupil costs made by agencies other than the local school system, by account category and by enrollment size of system and metropolitan status: 1970-71 51

K. 1-5 -- Expenditures of local public school systems for capital outlay and debt service, by account category and by enrollment size of system and metropolitan status: 1970-71 56

CONTENTS--(Continued) Page

L. 1-5 -- Expenditures of local public school systems for capital outlay and debt service made by the local school system, by account category and by enrollment size of system and metropolitan status: 1970-71 . 61

M. 1-5 -- Expenditures for capital outlay and debt service for school purposes made by agencies other than the local school system, by account category and by enrollment size of system and metropolitan status: 1970-71 66

N. 1-5 -- Current expenditures per pupil in average daily membership in local public school systems, by account category and by enrollment size of system and metropolitan status: 1970-71 71

O. 1-5 -- Current expenditures made directly by the local public school system, per pupil in average daily membership, by account category and by enrollment size of system and metropolitan status: 1970-71 76

P. 1-5 -- Current expenditures for school purposes made by agencies other than the local public school system, per pupil in average daily membership, by account category and by enrollment size of system and metropolitan status: 1970-71 81

Q. 1-5 -- Percent distribution of current expenditures allocable to pupil costs, by account category and by enrollment size of system and metropolitan status: 1970-71 86

R. 1-5 -- Percent distribution of current expenditures allocable to pupil costs made directly by the local public school system, by account category and by enrollment size of system and metropolitan status: 1970-71 91

S. 1-5 -- Percent distribution of current expenditures allocable to pupil costs made by agencies other than the local school system, by account category and by enrollment size of system and metropolitan status: 1970-71 96

Basic-Data Tables

1. Beginning balances, receipts, and incoming transfers, with source of revenue receipts, for selected local public school systems: United States, school year 1970-71 102

2. Revenue receipts from Federal sources, by program, for selected local public school systems: United States, school year 1970-71 166

3. Expenditures by purpose, outgoing transfers, and ending balances, for selected local public school systems: United States, school year 1970-71 206

4. Current expenditures, by account, for selected local public school systems: United States, school year 1970-71 . . . 262

5. Current expenditures per pupil in average daily membership (ADM), by account, for selected local public school system: United States, school year 1970-71 326

Appendix Tables

i. Universe, sample, and school-system grouping 363

ii. Coefficients of variation for survey variables, by enrollment size of school system, metropolitan status, and region 365

iii. Coefficients of variation for selected survey variables, by detailed survey cell 366

INTRODUCTION

The basic financial information for local public schools presented in this ELSEGIS publication covers the 50 States and the District of Columbia and was obtained from returns from 2,520 school systems (all but 4 of the systems included in the survey sample). The ELSEGIS system was designed to collect as much of the required data as possible from State education agency records. In 48 jurisdictions, the State agency furnished the data; in the remaining 3 jurisdictions, the local system performed that function.

Summary data are presented in tables A-S; quantitative information on individual school systems is given in five basic-data tables. Such data are used extensively by educational planners and researchers.

Most tabular presentation analyses in this publication are based on the following controls:

a. Six enrollment-size groups, based on school-system average daily membership (ADM):

25,000 or more
10,000 - 24,999
5,000 - 9,999
2,500 - 4,999
300 - 2,499
Under 300

b. Three metropolitan-status categories:

Metropolitan, central
Metropolitan, other
Nonmetropolitan

A school system was regarded as "metropolitan" if it was located in a county defined as a Standard Metropolitan Statistical Area (SMSA). In New England, SMSA's were determined on the basis of towns, rather than counties. A school system located outside the SMSA was classified as "nonmetropolitan."

Metropolitan systems were further defined as "central" or "other":

> If coterminous with or located within the boundaries of a central city (the large city comprising the hub of the SMSA), it was classified as metropolitan, central.
>
> If located within the SMSA but outside the central city, it was classified as metropolitan, other.
>
> If, as in some large county-unit school systems, the population of a central city (1960 census) within the system was 50 percent or more of the county population, the system was regarded as metropolitan, central; if less than 50 percent, metropolitan, other. For example, the Mobile County, AL, school system was classified metropolitan, central, because Mobile City made up 54 percent of the county population; but the Dade County, FL, system was placed in the metropolitan, other, category because the central city of Miami accounted for only 31 percent of the county population.

c. Four regions of the United States:

North Atlantic	Great Lakes and Plains	Southeast	West and Southwest	
Connecticut	Illinois	Alabama	Alaska	Utah
Delaware	Indiana	Arkansas	Arizona	Washington
District of Columbia	Iowa	Florida	California	Wyoming
Maine	Kansas	Georgia	Colorado	
Maryland	Michigan	Kentucky	Hawaii	
Massachusetts	Minnesota	Louisiana	Idaho	
New Hampshire	Missouri	Mississippi	Montana	
New Jersey	Nebraska	North Carolina	Nevada	
New York	North Dakota	South Carolina	New Mexico	
Pennsylvania	Ohio	Tennessee	Oklahoma	
Rhode Island	South Dakota	Virginia	Oregon	
Vermont	Wisconsin	West Virginia	Texas	

Summary tables are presented in clusters of five with the first table covering the United States and the others covering each of the four regions. In addition, in the expenditure summary tables, each group of variables is presented in a set of three tables, each with the same table stubs and box-heads. However, as explained in the titles, the first set of tables covers expenditures from all sources; the second set, expenditures made directly by the local education agency; and the third set, expenditures made in behalf of the school system by other agencies.

Listed below are the two-position State abbreviations adopted by the U. S. Postal Service and used in the basic-data tables:

State	Abbreviation	State	Abbreviation
Alabama	AL	Missouri	MO
Alaska	AK	Montana	MT
Arizona	AZ	Nebraska	NB
Arkansas	AR	Nevada	NV
California	CA	New Hampshire	NH
Colorado	CO	New Jersey	NJ
Connecticut	CT	New Mexico	NM
Delaware	DE	New York	NY
District of Columbia	DC	North Carolina	NC
Florida	FL	North Dakota	ND
Georgia	GA	Ohio	OH
Hawaii	HI	Oklahoma	OK
Idaho	ID	Oregon	OR
Illinois	IL	Pennsylvania	PA
Indiana	IN	Rhode Island	RI
Iowa	IA	South Carolina	SC
Kansas	KS	South Dakota	SD
Kentucky	KY	Tennessee	TN
Louisiana	LA	Texas	TX
Maine	ME	Utah	UT
Maryland	MD	Vermont	VT
Massachusetts	MA	Virginia	VA
Michigan	MI	Washington	WA
Minnesota	MN	West Virginia	WV
Mississippi	MS	Wisconsin	WI
		Wyoming	WY

* ESTIMATED.

Appendix A

SAMPLE DESIGN AND SELECTION

The population of inquiry was based on the 17,498 operating local public school systems listed in Education Directory, Public School Systems, 1970-71. However, two types of adjustments were made to this universe. Certain special districts (72) included in the Directory were considered out of the survey scope. Also, adjustments were made to the universe to cover the fact that some sample school systems (25) reported as "operating" in the directory were either nonoperating or consolidated with other systems. After adjustments, the net universe for purposes of this survey consisted of 17,067 school systems.

The sample design was based on the following criteria:

1. The sample was to be used for analytic and enumerative purposes.

2. The total sample was to consist of about 2,500 school systems.

3. At the national level, the relative error for characteristics of major interest was not to exceed 3 percent at the 2-sigma level.

4. Within each region, for each enrollment-size group of 300 or more, the relative error of the statistic "Current expenditures per pupil in ADM" was not to be greater than 7.5 percent at the 2-sigma level.

5. Within each region, for the "under-300 enrollment size," the relative error of the statistic "Current expenditures per pupil in ADM" was not to be greater than 10 percent at the 2-sigma level.

6. All systems with enrollments of 10,000 or more were to be taken with certainty.

7. The minimum size in any cell was to be 50 or equal in number to the population.

The sample design was a single-stage random sample in which school systems within sampling strata were selected in a systematic random manner. Specifically, the school systems were stratified into size-group, region, and metropolitan-status cells. (These categories are defined in the introduction.) Within each cell the systems were ranked in descending order of enrollment; thus, after a random start, the sample systems were selected on the basis of the sampling ratio for the cell. This procedure yielded a sample of 2,549 systems. However, 25 systems were no longer in operation and 4 were nonrespondents, thus leaving a net sample of 2,520 systems.

In the basic-data tables, school systems were listed by enrollment-size stratum on the basis of the ADM figure reported on the report form rather than on that reported in the Education Directory. In the summary tables, school systems were grouped on the basis of the ADM reported in the survey but inflated on the basis of original sample selection (i.e., the ADM figure reported in the Education Directory). Sampling information--including the universe, sample, inflation factor, and the number of systems listed and grouped in each cell--is given in table i.

Sampling Reliability

Estimated totals for each survey cell were arrived at by inflating the figures for each survey cell by the reciprocal of the inflation factor adjusted for nonresponse. Because the figures in this report are estimates derived from a sample, they are subject to sampling error. Approximations to the sampling variance were computed by means of the successive-difference method. For convenience of interpretation, the variances were converted to relative sampling errors or coefficients of variation and are presented in tables ii and iii. Table ii gives coefficients of variations for most of the survey items for the U. S. total and for the marginal totals--enrollment size, metropolitan status, and region; table iii gives coefficients of variation for selected variables for detailed survey cells. The chances are about 2 out of 3 that the percentage difference between an estimate and the figure that would have been obtained from a complete canvass of all school systems using the same survey forms and procedures would be less than the limit of error specified in the table. Similarly, the chances are about 19 out of 20 that the percentage difference would be less than twice the specified limit of error, and about 99 out of 100 that it could be less than 2.5 times the specified limit. An illustration of the use of the sampling variability tables follows:

> The national estimate of the current expenditures per pupil for nonmetropolitan school systems is $702.72 (table N.1). The coefficient of variation given in table ii is 0.7 percent or $4.92. In applying the

probabilities described above, the chances are about 2 out of 3 that the figure of $702.72 would not differ by more than $4.92 from the results of complete coverage of all school systems.

The coefficient of variation does not reflect response biases or systematic errors that may have occurred in the data-handling process, such as would be applicable even if there were complete coverage of all school systems. However, concerted effort was made to minimize such errors through editing and followup procedures.

NOTE.--Figures in "sample" column represent the total sample, including nonrespondents, the number of which is shown in parentheses. Figures in "grouping" column show the number of systems grouped in each category. Because of changes in ADM, some systems are grouped in a different enrollment-size stratum from the one in which they were originally selected.

Table ii. --Coefficients of variation[1] for survey variables, by enrollment size of school system, metropolitan status, and region

Item	Total U. S.	Enrollment size[2]				Metropolitan status[2]		Region

Appendix B

METHODOLOGY AND SPECIAL NOTES

Survey Methodology

Data for this report were transmitted on a standard survey form (appendix D) developed by NCES staff in consultation with the Council of Chief State School Officers' Committee on Educational Data Systems (CEDS). Preaddressed and coded forms for the local school systems included in the sample were mailed to the research and statistics department in each State education agency. States had the option of either providing the data from records already existing in their own files or forwarding the form to the local school systems for completion. All but seven States were able to compile the reports from their own records.

To assure maximum comparability, the items and their definitions were designed to agree wherever possible with the categories and terminology of the U. S. Office of Education Handbook II-Financial Accounting for Local and State School Systems.

A computer-edit program was developed to detect serious reporting problems. Despite the increasing use of Handbook II, many variations in recording and accounting methods still prevailed among the State and local school systems. As a result, the computer checks turned up numerous apparent reporting problems. Every effort was made to secure data comparable from State to State and school system to school system. Remaining serious discrepancies or gaps in the data are indicated by footnotes in the basic-data tables.

Explanation of Data

Item definitions are given in the introductions to the survey form. Some important explanations and limitations which refer to the basic-data tables, the summary tables, or both are given below:

Beginning and ending balances. Some fiscally dependent systems do not carry balances, because at the end of the fiscal year all unspent funds

revert to the government unit of which the school system is a part. Balances do not necessarily indicate an excess of income over expenditures, because they usually are obligated for special purposes.

Revenue receipts from State sources. These do not include Federal funds distributed through the State education agency. Respondents were asked to include as State receipts the school-purpose contributions that, in some States, do not go through the books of the local school system (e.g., State contributions to employee retirement and textbooks furnished by the State). In many instances, the value of such contributions was estimated.

Revenue receipts from Federal sources. These include funds from Federal programs going to local school systems either directly or through the State as a distributing agency. Not included is the amount for Federal programs going to agencies other than the local public school system (e.g., that part of ESEA title I dealing with programs for State-operated or -supported schools for the handicapped). For the most part, the receipts reported here are those recorded as receipts in the school system's regular accounting procedures. They are not official U. S. Office of Education or State education agency figures on allotments or disbursements.

Vocational education program. In some cases, the distribution of vocational education funds by source (i.e., Federal versus State receipts) was estimated.

School lunch and milk programs. The data in this report include financial assistance only; they exclude the value of donated commodities.

Current expenditures allocable to pupil costs. These are the accounts which, because of their direct relationship to the education program, were recommended in Handbook II for use in determining current expenditures per pupil.

Further Considerations in Use of Data

In addition to the data limitations just cited, the users of the data who are interested in making direct comparisons among individual school systems should be guided by the following:

1. The State education agencies and the local school systems were encouraged to provide reasonable estimates where precise data were not available. Comparisons among individual school

systems may be affected to the extent to which they involve such estimates.

2. A complex of factors may be involved in the explanations of observed differences. Thus, there are instances in which a school system will compare unfavorably with another in terms of a given statistical indicator when it may be an equal or superior system. For example, suppose school system "X" makes considerably higher expenditures per pupil than system "Y." On the surface, system "X" appears to be devoting more resources to education. Further investigation may indicate, however, that there are reasons for the differences which are not directly related to educational output. For example, although having a generally lower pay scale than system "Y," system "X" may have a much higher proportion of older teachers drawing salaries near the top of the scale; the higher salaries, in turn, will lead to higher teacher-retirement payments. This may result in a higher general level of expenditures without necessarily a higher general level of support for public education or a superior program.

Appendix C

RELATED DATA

In addition to this study, which is designed to collect data on individual school systems as well as to provide national estimates, NCES conducts three surveys from which national financial statistics are derived. In each of these three surveys, data are collected in the form of State aggregate reports: educational research and statistics staff in each State summarize local school-system data and send NCES a composite State report.

The State elementary and secondary school statistics survey, taken biennially, covers comprehensive data on public school organization, staff, pupils, and finances. Statistics of State School Systems, 1969-70 is the most recent report in this series. The fall report of membership and teachers conducted annually, early in the school year, includes a supplemental section requesting estimates of four broad expenditure categories for the school year. Statistics of Public Schools, Fall 1970 presents this information for the school year 1970-71. An annual survey of current expenditures made by local education agencies for free public elementary and secondary education is conducted to establish the average per-pupil expenditure in a State as required for the administration of Title I of Public Law 89-10 (Elementary and Secondary Education Act of 1965) and Title I of Public Law 81-874 (School Assistance in Federally Affected Areas). A resulting publication, Current Expenditures by Local Education Agencies for Free Public Elementary and Secondary Education, 1970-71, covers the same time period as this report.

The biennial survey and the fall report include data on finances of intermediate administrative units and of State education agencies; the current expenditure survey does not.

Because of differences in purpose, coverage, and method of data collection, estimates in the present publication will differ from figures for the same or similar variables presented in other OE publications.

PREPARED BY *(name and title)*

TELE-PHONE	AREA CODE	NUMBER	EXTENSION

This is the financial part of ELSEGIS IV the fourth annual Elementary-Secondary General Information Survey conducted by the U.S. Office of Education with the cooperation of the Committee on Educational Data Systems *(CEDS)* of the Council of Chief State School Officers.

Data from previous ELSEGIS Surveys have been the only sources of detailed data on individual school systems. The National Center for Educational Statistics has made these data available to those interested in doing research with the aim of improving American education. Data are being requested from a sample of local public school systems. Your cooperation in the continued success of this important survey series is very much appreciated.

In completing the items, please follow the attached instructions and refer to Handbook II, Financial Accounting for Local and State School Systems.

INSTRUCTIONS FOR COMPLETING OE FORM 2350-2

ELEMENTARY-SECONDARY GENERAL INFORMATION SYSTEM, PART B-1

GENERAL INSTRUCTIONS

Data should be reported for the school year 1970-71.

Enter data into the proper field. If there is no entry for a particular field leave the entire field blank. If precise data are not available, please provide your best estimate for the entry for that item and enter a "1" in the column provided.

In order to achieve maximum comparability, a second column has been set up to report expenditures for school purposes made by agencies other than the local school system which are not entered on the books of the school system. Examples of such "expenditures by other agencies" are:

a. Value of textbooks furnished by the State.

b. State or other contribution to employee retirement.

c. Health services provided by a public health agency.

d. Capital outlay payments made by county or municipal government, or schoolhousing authority.

The source of these expenditures should not be reported in items A-J, but in item T.

Item definitions are, for the most part, condensations of those given in Handbook II, FINANCIAL ACCOUNTING FOR LOCAL AND STATE SCHOOL SYSTEMS. Please refer to Handbook II if necessary.

NOTE: The number(s) in parenthesis after each line and item number refer to Handbook II codes.

ITEM A. BALANCES ON HAND BEGINNING OF YEAR

ITEM A1. Enter the balance of all funds on hand from the previous year which were available for the current operations of schools in the school year 1970-71, i.e., all those balances not earmarked for the special purposes listed in the instructions for line A2.

ITEM A2. Enter the balances set aside for *(a)* new construction or modifications of physical plants and *(b)* retirement of principal and payment of interest on serial bonds.

ITEM B. REVENUE FROM LOCAL SOURCES *(10)*.

ITEM B1. *(11)*. Include taxes received from school system levies and taxes or appropriations received from local government units other than the school system.

ITEM B2. *(12, 13)*. Include tuition and transportation fees received from patrons.

ITEM B3. *(14)*. Enter here other revenue receipts from local sources such as earnings from permanent funds, endowments, deposits, and investments, NET receipts from food services, student body, or other activities, rents, gifts, etc.

ITEM C. REVENUE FROM INTERMEDIATE SOURCES *(20)*.

Include funds collected by a subdivision between the local school system and the State *(e.g., county, supervisory union, etc.)* and distributed to school systems in amounts different from those collected within the system.

ITEM D. REVENUE FROM STATE SOURCES *(30)*. Include here only those funds collected by the State and distributed to the school systems. DO NOT include funds from the Federal government that are distributed through the State agency. Exclude the value of textbooks provided by the State to the local school system, and the State's DIRECT contribution to local school system employee retirement. Revenues for such direct payments are to be reported in Item T.

ITEM E. REVENUE FROM FEDERAL SOURCES, BY PROGRAM *(40)*. Include here all funds received from the Federal Government either directly or through the State as a distributing agency.

This instruction is consistent with the revision to Handbook II made by the Office of Education - Committee on Educational Data Systems' *(OE-CEDS)* School Finance Standing Committee. The change was transmitted to the State education agencies by a memorandum dated February 16, 1966. Essentially, this memorandum provided that the sections on REVENUE FROM STATE SOURCES and REVENUE FROM FEDERAL SOURCES *(pp. 15-17)* be reorganized as follows:

30. Revenue from State Sources

40. Revenue from Federal Sources

40a. Federal Money Received Directly From the Federal Government

40b. Federal Money Received Through the State

In some Federal programs, e.g. ESEA, Title III, projects are sometimes shared by several school systems with one school system serving as the agent for the project. Where this occurs, receipts and corresponding expenditures should be reported for each of the participating school systems. If the exact amounts received and expended are not available, estimate on a reasonable pro-rata basis.

ITEM E1. Include receipts under ESEA, Title I for the support of educational programs in areas having high concentrations of children from low-income families and migrant children.

ITEM E2. Include receipts under ESEA, Title II for school library resources, textbooks, and other instructional materials.

ITEM E3. Include receipts under ESEA, Title III for supplementary educational centers and services. *(see special instructions above)*.

ITEM E4. Include receipts under ESEA, Title VI *(also known as the Education of the Handicapped Act, Part B2)* for regional resource centers to improve education of handicapped children.

ITEM E5. Include receipts under ESEA, Title VII for bilingual education programs.

ITEM E6. Include receipts under ESEA, Title VII for dropout prevention programs.

ITEM E7. Include receipts under NDEA, Title III to strengthen instruction in critical subjects.

ITEM E8. Include receipts under Public Law 815 to aid school districts in providing minimum school facilities in federally impacted and disaster areas.

ITEM E9. Include receipts under Public Law 874 for operational aid to school districts on which Federal activities or major disasters have placed a financial burden.

ITEM E10. Include receipts for Head Start programs operated

directly by the school system. Do not include programs operated by the school system on behalf of another agency or by the other agency itself.

ITEM E11. Include receipts for Follow Through programs operated by the local school system.

ITEM E12. Include receipts received under the Federal Vocational Education Acts. Do not include State vocational education funds.

ITEM E13. Include funds received under the National School Lunch and Special Milk Programs. REPORT CASH PAYMENTS ONLY. DO NOT include the value of commodities.

ITEM E14. All other receipts from Federal sources - Include here any receipts not covered in lines E1 - E13 above.

ITEM G. TOTAL NONREVENUE RECEIPTS. Enter receipts from the sale of bonds, long and short term loans, sale of real property and equipment, and proceeds from insurance adjustments.

ITEM H. INCOMING TRANSFERS. Enter the total amount received from other school systems for tuition, transportation, or other services rendered. Do not include transfers from other funds of your own school system.

ITEM K. CURRENT EXPENDITURES, SCHOOL YEAR 1970-71. Report current expenditures made during the school year 1970-71 from all funds regardless of source of funds. Separate direct expenditures made by the local system from those made by other agencies. If possible, report all expenditures made for school purposes by other agencies by purpose in the "other agencies" column.

ITEM K1. *(100 series)* Enter expenditures for those activities which have as their purpose the general regulation, direction, and control of the affairs of the school system that are system wide and NOT confined to one school, subject, or narrow phase of activity. Include salaries, contracted services, and other expenses for administration.

ITEM K2a. *(211-214)* Enter salaries of professional instructional staff - teachers, principals, supervisors of instruction, guidance and psychological staff, librarians, and audiovisual staff.

ITEM K2b. *(215-216)* Enter salaries of nonprofessional instructional staff - teacher and library aides, secretarial and clerical assistants, and any others who aid the professional instructional staff.

ITEM K2d. *(220-250)* Enter expenditures for the textbooks furnished free to pupils, including the value of textbooks provided by the State, school libraries and audiovisual materials, teaching supplies, the net cost to the school system of rented books, and other expenses for instruction.

ITEM K3. *(300 series)* Enter salaries and other expenses for those activities which have as their primary purpose the promotion and improvement of children's attendance at school, include salaries of social workers and visiting teachers.

ITEM K4. *(400 series)* Enter salaries and other expenses for physical and mental health activities *(other than direct instruction)* i.e., medical, dental, psychiatric, and nurse's services.

ITEM K5. *(500 series)* Enter salaries and other expenses for those activities which have as their purpose the conveyance of pupils to and from school or on trips for curricular or cocurricular activities, including salaries of drivers, mechanics, etc., contracted services or public carriers, replacement of vehicles, pupil transportation insurance expenditures in lieu of transportation, and operation and maintenance of transportation equipment.

ITEM K6. *(600 series)* Enter salaries and other expenditures concerned with keeping the school plant open and ready for use.

ITEM K7. *(700 series)* Enter salaries and other expenditures for activities concerned with keeping the grounds, buildings, and equipment at their original condition of completeness or efficiency.

ITEM K8. *(800 series)* Enter expenditures of a generally recurrent nature which are not readily allocable to other expenditure accounts, including: employer contributions *(State or school system)* to employee retirement, social security, insurance and judgements, rental of land and buildings *(EXCLUDING lease payments to authorities and interest on current loans.)*

ITEM K10. Enter the NET expenditures, if any, for food services operation, i.e., the gross expenditures less the cafeteria sales. If the receipts from cafeteria sales equal or exceed expenditures, enter a zero on this line. Exclude the value of commodities donated by the U.S. Department of Agriculture.

ITEM K11. Enter the NET expenditures, if any, for such extracurricular activities as interscholastic athletics, entertainment, publications, and clubs. If any receipts from such activities exceed expenditures, enter a zero on this line.

ITEM K12. Enter expenditures for *(a)* services provided by the school system for the community, such as recreational activities, civic activities, public libraries operated by the school system, child care centers of the school system, welfare activities of the school system, services to nonpublic school pupils, etc., *(b)* summer schools, i.e., schools in session between the end of the regular school term and the beginning of the next regular school term. Include expenditures for summer Head Start programs operated as part of the school system's program, *(c)* adult education programs, and *(d)* junior college programs *(grades 13 and 14)* operated by the local public school system.

ITEM L. CAPITAL OUTLAY *(1200 Series)*

ITEM L1. *(1210-1220)* Enter expenditures for the acquisition of sites, new buildings, and improvements to existing structures.

ITEM L2. *(1230)* Enter expenditures for NEW items of equipment.

ITEM M. DEBT SERVICE *(1300 Series)*

ITEM M1. *(1310)* Enter the amount expended to retire serial bonds, short-term and long-term loans, warrants, or bills.

ITEM M2. *(1320)* Enter the amount expended for interest on bonds, and short-term and long-term loans.

ITEM M3. *(1330)* Enter the amount paid into sinking funds which are to be used at some future date to retire term bonds.
NOTE: This line is applicable in only a few States. Do NOT use this line to report the total of M1 and M2.

ITEM M4a. *(1340a)* Enter the amount paid for principal to school housing authority or similar agency.

ITEM M4b. *(1340b)* Enter the amount paid for interest to school housing authority or similar agency.

ITEM M5. *(1350)* Enter expenditures for any expense incurred in connection with debt service not covered above. *(Exclude those connected with sale of bonds.)*

ITEM N. Enter those payments made to other school systems or administrative units *(including nonpublic schools)* for tuition and transportation.

ITEM O. Include here any expenditures not reported elsewhere on the form. THIS ITEM SHOULD BE USED AS INFREQUENTLY AS POSSIBLE, i.e., only after careful scrutiny has revealed that a given expenditure is inapplicable to any of items K-M.

ITEM P. REVENUES RETURNED TO APPROPRIATING AUTHORITY. Include moneys received which for any reason were returned to the appropriating agency – Federal, State, or local.

ITEM R. BALANCES ON HAND AT END OF YEAR.

ITEM R1. Enter the balance of all funds which will be available for the current operation of schools in the school year, 1971-72, i.e., those balances not earmarked for special purposes listed in the instructions for line R2.

ITEM R2. Enter the end-of-year balances set aside for: *(a)* new construction or modification of physical plant or *(b)* retirement of principal and payment of interest on serial bonds.

ITEM T. Report here the source *(local, State, or Federal)* of the expenditures reported in the "other agencies" column.

ITEM U. Report Average Daily Attendance *(ADA)* and Average Daily Membership *(ADM)* in full-time elementary and secondary day schools in accordance with the formulas given below, exclude students in summer schools, adult education, or junior colleges, and pupils attending school in another district or in nonpublic schools. Report to the nearest whole number.

$$\text{ADA} = \frac{\text{Annual aggregate days attendance}}{\text{Actual number of days taught}}$$

$$\text{ADM} = \frac{\text{Annual aggregate days attendance plus annual days absence}}{\text{Actual number of days taught}}$$

A half-day nursery school or kindergarten should be counted as full time for purposes of determining average daily attendance and average daily membership. For example, if 100 pupils attended nursery school in the morning and a different group of 100 pupils attend in the afternoon, the aggregate attendance for the day would be 200.

HIGHLIGHTS--(Continued from inside front cover)

Current Expenditures per Pupil

Current expenditures per pupil in average daily membership (ADM) came to $796. Average per-pupil expenditures were highest in systems with enrollment of 25,000 or more ($837) and decreased consistently, with each smaller enrollment group, up to the under-300 enrollment group, at which point there was an upturn. This upturn for the very smallest systems was due primarily to the higher relative costs for administration and pupil transportation. Expenditures per pupil in metropolitan systems were generally higher than in nonmetropolitan systems. Per-pupil expenditures among the regions ranged from a low of $598 in the Southeast region to a high of $1,017 in the North Atlantic States. (See tables N. 1-5.)

Expenditures

Total outlays for public school purposes, including current expenditures, capital outlay, and debt service, came to $45.4 billion. Of this amount, $44.5 billion was a direct expenditure of the local school system and $946 million was a school-purpose expenditure made by other agencies. Current expenditures--those for day-to-day school operations--accounted for $37.4 billion (82 percent of all expenditures); capital outlay for $4.1 billion (9 percent); and debt service expenditures for $3.6 billion (8 percent). (See tables E. 1-5, F. 1-5, and G. 1-5.)

Distribution of Expenditures

Of the $37.4 billion in current expenditures, $35.8 billion (96 percent) went into the accounts used in determination of per-pupil expenditures. About three-fourths (73 percent) of these "allocable" expenditures went for instruction. The other accounts in descending order of expenditure level were: operation and maintenance of plant, 11 percent; fixed charges, 8 percent; pupil transportation services and administration, each about 4 percent; and attendance and health services, 1 percent. In general, the overall distributional pattern was constant and pertained also to the survey subgroups--region, size, and metropolitan-status category. (See tables Q. 1-5.)

END
